

Oil Only Socks, Pads and Drain Booms

Oil-Only Socks

Suitable for containing and absorbing larger spills and placing around machinery.

- Manufactured from highly hydrophobic materials, our socks will absorb oil and hydrocarbon based products whilst repelling water.
- Any size manufactured to order.
- Place around leaking machinery to prevent danger in the workplace.
- Use as a temporary bund to protect vulnerable areas such as drains, surface waterways and sensitive equipment.

Oil-Only Pads

Conveniently sized sheets ideal for the cleaning of industrial tools, machinery and for general spill control.

- Manufactured from highly hydrophobic material, these pads will absorb oil and hydrocarbon-based products whilst repelling water.
- Suitable for both indoor and outdoor use. Effective in wet or dry conditions.
- In emergencies can be rolled up and used as a sock.
- Fast wicking action reduces the spill time and downtime associated with oil spills.

Oil-Only Drain Booms

Used for cleaning oil contaminated water from drains, interceptors and bilges. Supplied with a ring and rope for ease of deployment and retrieval.

- Manufactured from highly hydrophobic material, these pads will absorb oil and hydrocarbon-based products whilst repelling water.
- Encased in a tough outer polypropylene for long life and durability.
- Helps reduce the bacteria levels in the system.
- The strong polypropylene rope gives added strength and durability. This also stops the drain boom from stretching, which can lead to splitting.
