Bio Force

Natures Industrial Microbial Cleaner and Stain Remover

Bio-Force utilises microbial technology to remove oil and petroleum related stains from hard surfaces including concrete, paving, sandstone and ballast etc.

Speeds up the degradation of Hydrocarbons

Solve Free Applications

Bio-Force Application

- Can be utilised for contaminated soil remediation projects & waste containment
- Ideal for use on areas where hydrocarbons have stained public walkways
- For cleaning compacted deposits of sump oil or stains in car parking bays

Bio-Force Users

- Car manufacturers
- Fuel stockists & Distributors
- Oil production sites
- Remediation contractors
- Waste companies
- Public transport companies
- Contract cleaners

ENVIRONMENT

Bio-Force is a safer, non- flammable alternative to the conventional harsh cleaners associated with the cleaning of heavy spillages.

VERSATILE

Substitutes the use of caustic, acidic & citrus cleaners.

ECONOMICAL

Bio-Force dilutes at ratios between 1:4 and 1:12 depending on the contamination. Refer to label for full instructions

HOW TO USE

Bio-Force can be applied directly to the contaminated area through large or small spray equipment. Scrub area well and allow to penetrate, re apply if necessary. Rinse afterwards. The microbial action in Bio-Force will degrade the stain through time.

Bio-force's performance can be enhanced when concentrate is mixed with warm water.
