

## Dis-Solve

### Performance, low hazardous solvent degreaser

Dis-Solve was developed to attack and break down compacted heavy oils and greases often associated with heavy industrial on site cleaning. Dis-Solve offers high performance with reduced costs.

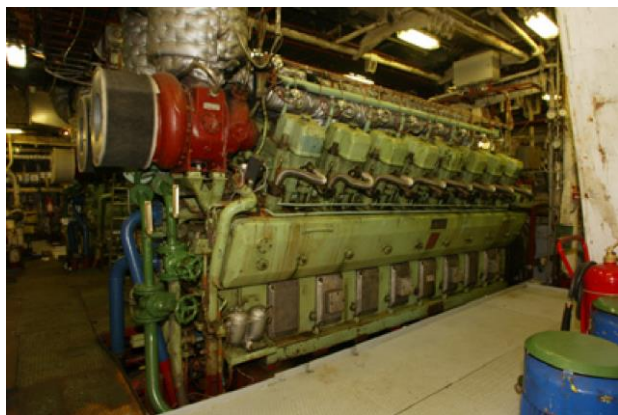

### Dis-Solve Application

- Cleans heavy compacted oil & grease from surfaces, plant and equipment.
- Breaks down deposits of waxes, crude oil and specialist lubricants, including "Motak".
- Cleans anti-vibration sealants off surfaces and floors.

### Dis-Solve Users

- Car manufacturers
- Fuel stockists & Distributors
- Oil production sites
- Remediation contractors
- Waste companies
- Public transport companies
- Heavy engineering works
- Rail repair workshops

#### SAFETY AND ENVIRONMENT

Safer to use in comparison to other solvents where O.E.L.'s are a concern.

#### VERSATILE

Excellent for removing a diverse range of Hydrocarbon deposits including various oil based sealants and coatings.

#### EFFECTIVE

Dis-Solve is a quality cleaner, which has a controlled evaporation, allowing the product to stay in contact with the surface longer, ensuring a cleaner result.

#### EXTREME DUTY APPLICATIONS

In severe applications (solid soils etc.) Dis-Solve super may be required. Both products are available in non-emulsifiable format.
