Spill Hound Marine

The environmental answer to spills on water

Spill Hound Marine is a 100% cellulose absorbent that has been developed to deal with spillages of Hydrocarbons on water. **Spill Hound Marine** is biodegradable and manufactured from recycled materials which are harmless to animals and aquatic life. Once applied the super buoyancy of **Spill Hound Marine** will ensure effective removal. It will absorb oil from water by selectively absorbing hydrocarbon-based products **Spill Hound Marine** helps reduce the sheen (rainbow) often left on the waters surface.

The Benefits of Spill Hound Marine

- **Quick to deploy and effectively contains oil spills.**
- **Ability to still float even when completely consumed with oil.**
- **Non Hazardous to animals and aquatic life. Including Fauna and Flora**
- **Can be used in loose form and retrieved by nets.**
- **Non toxic, non abrasive, non carcinogenic, non volatile and 100% biodegradable.**
- **Can be incinerated, leaving less than 5% ash**
- **Lightweight packaging for ease of use**
- **Economical**

Applications:- marinas, rivers and streams, bilge cleaning, harbours, canals, docks, refuelling depots, beaches, bird sanctuaries and interceptors.

Wherever a spill might happen on water.
